

DATASHEET

Outdoor Infrared heater OC Series

3 Years Product Warranty

The OC Series represents powerful outdoor heaters offered exclusively by Sundirect and is designed for outdoor heating only. It offers more power and concentrated heating compared to our hybrid Space Heater SC Series, making it perfectly suitable for windy uncovered outdoor areas. The OC Series is rated IP65, making it waterproof and usable for most outdoor applications.

Its unique ultra low light carbon fibre heating element is the key difference compared to existing outdoor heaters on the market using mostly halogen or quartz. This grants a longer lifespan and higher energy efficiency. The OC Series emits long wave infrared (300-350W) creating a light glow and cozy warmth rather than heat.

The integrated control system allows operation of 2 power levels using a simple remote control. You can easily adjust the power settings of the heater and also turn it on/off remotely. There are 2 power settings available (50%/100%) which means you are flexible and able to adjust to different applications.

DATASHEET

Outdoor Infrared heater OC series

Model	Size	Power	Mounting	Heated Area
OC2000	72*12*12mm	2000W	Wall only	10-20m ²
OC2500	77*12*12mm	2500W	Wall only	12-25m ²

Heating element: Ultra low light carbon fibre heating element
 Surface temperature: 300-350 degrees celsius
 Reflection material: Aluminum reflection layer
 Plug: 1.9m EU standard Plug

Energy efficiency: up to 95%
 Voltage: 220~240V, 50Hz
 Protection: IP65
 Power switch: YES
 Power setting: 2 levels
 Remote control: YES
 Lifespan: 6000 working hours under proper usage
 Certification: CE, ROHS

Notice:
